

Reduce Time to Train and Improve Productivity

Workforce Acceleration with Four Strategic Efforts

1. Apprentice Training Programs

Index significantly reduces skilled worker training time using Lean process, instructional design and first-hand knowledge from experienced client SMEs.

Our multi-modal eBooks and apps are used in complex apprentice and skilled worker training programs in high-risk, high consequence environments. Reading, auditory, visual and AR experiences remove the learning friction found in traditional materials.

2. Critical Worker Task Guidance

Our complex step-by-step apps enable employees to execute essential tasks with precision and eliminate errors. Index apps have measured client ROIs north of 100%.

3. Talent Pipeline Development

Index enhances your partnerships with community colleges and local institutions to grow role-ready talent. We align curriculum to your needs - expanding access to a high quality and sustainable talent pipeline.

4. Life Extension

Index extends the life of your materials to keep your training and critical task guidance current. Ensure lasting alignment, risk mitigation and compliance.

Over 1,000 apps and eBooks developed and deployed.

Index Proven Workforce Digital Products

- **Mobile Training Applications:** Intuitive, step-by-step digital tools featuring 3D models, augmented reality and real-time critical task guidance.
- **Interactive Index eBooks:** Immersive, multi-media content developed alongside your top performers with embedded videos, graphics and knowledge checks.
- **Hub Library:** Access Index eBooks and apps through a hub knowledge center that is available to workers before, during and after events, keeping essential content always within reach.
